

Description	
Product Type	Balustrade
Product Line	Seamless
Product Name	Seamless Fin

**Product Description**

Standing out from the crowd has never been easier with Spectrum's new Seamless Fin balustrade. Super contemporary and delivering a wow factor not previously seen in aluminium balustrading, the Seamless Fin is a modern rendition of traditional steel balustrading. Pre-assembled section lengths are only limited by the logistics of transportation and installation.

- Face fixed
- Top fixed

Surface finishes can be power coated or anodized in a range of standard colours.

**Conditions of use**

Seamless Fin must be installed by Spectrum or an approved installer, and as per fixing details provided by Spectrum.

**Relevant Building Codes**

B1 Structure — B1.3.1, B1.3.2, B1.3.3 (f, h, j), B1.3.4

B2 Durability — B2.3.1 (a), B2.3.2 (a, b)

D1 Access Routes — D1.3.3 (j, k)

F4 Safety from falling — F4.3.1

F9 Means of restricting access to residential pools — F9.3.1, F9.3.3

## Contributions to compliance

- B1 (Structure)** This product has been rigorously tested by a certified engineer to ensure full compliance with the relevant code.
- B2 (Durability)** Manufactured from aluminium and stainless steel fasteners the product is designed and manufactured to provide a long service life when installed and maintained as per manufacturers guidelines.
- D1 (Access Routes)** When utilised as an access route solution the product is fully compliant providing it is manufactured and installed with the appropriate offset handrail.
- F4 (Safety from falling)** The product is manufactured under strict guidelines to ensure requirements under the building code are met and the product can not be penetrated, climbed over, or dislodged under normal operating conditions.
- F9 (Pool fencing)** When installed with appropriate gate hardware the product adequately complies with all applicable aspects of the building code.
