

EVO Max Fin

EVO Max Fin

The EVO Max system is the ideal system for high occupancy locations that are prone to overcrowding, such as schools, grandstands, and shopping centers.

Sharing design elements with our popular Face Hung Fin balustrade system and by incorporating a more robust post and handrail, this allows EVO Max Fin to comply with the C5 classification for barriers. Vertical fins fixed to the front of the structural frame, delivering a sleek appearance.

Features

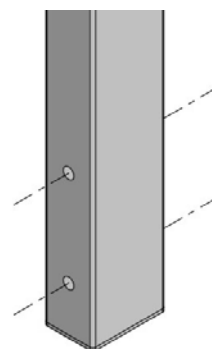

- Suitable for C5 occupancy loads where the area is susceptible for overcrowding
- Fins can cover deck edge and/or extend to make privacy screens
- Structural steel posts, with aluminium horizontal rails and fins

Technical Specification

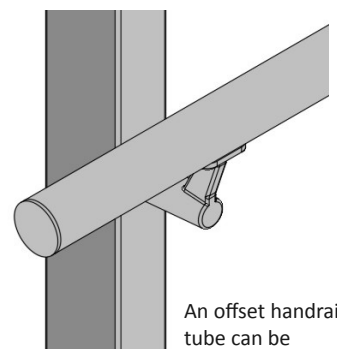

- Surface Finish:
 - Powder-coated aluminium (Dulux Duralloy or Duratec range)
 - Painted Steel
- Materials:
 - 6060 T6 aluminium
 - Mild Steel
 - 316 Stainless Steel
- Compliance:
 - B1 (Structure)
 - B2 (Durability)
 - D1 (Access routes)
 - F4 (Safety from falling)
 - F9 (Pool Fencing)
- Occupancy: C5, C1, C2, D
- Installation: Spectrum balustrade systems to be fully installed by accredited installers

Technical Details

Face Fixed Only

An offset handrail tube can be added for stairs
